

Civil Engineering

Civil engineering, the oldest of the engineering disciplines, has shaped our past and is helping to define and build our future. More than any other engineering discipline, it relies on communication skills and sensitivity to the needs of society. Civil engineers are among the highest users of computer technology and are a strong force behind many breakthroughs in automation and computer-aided design.

Civil engineers at Stanley Consultants are challenged daily to design smooth roads and highways, efficient military facilities, safe bridges and buildings, reliable water supply systems, environmentally sensitive sewers, and amenity-filled planned communities.

MORE THAN ENGINEERING

Stanley Consultants INC.

A Stanley Group Company
Engineering, Environmental and Construction Services - Worldwide

Civil Engineering

Master Planned Community

Roundabout Traffic Calming

Flood Control

Wastewater Treatment Plant

For over 90 years Stanley Consultants has provided engineering, architectural, environmental, and construction services worldwide. Providing these services from many domestic and overseas locations, we are ranked among the best engineering firms in the U.S.

At Stanley Consultants we value our members and their capabilities, initiative, integrity, creativity, and commitment as our most important assets. We strive to provide satisfying growth opportunities and a role in shaping our mutual future. We offer the opportunity to work on a variety of interesting projects across the U.S. and overseas in a professional and challenging work environment. We encourage professional and personal development by providing a learning environment that offers training, continuing education, licensing, and mentoring programs. Career paths are available for members who want to build upon their technical expertise, for those working through the project organization to become project managers, for potential line managers, and for those interested in business development and marketing.
