

Mechanical Engineering

Among the most diverse of the engineering fields, mechanical engineering affects all aspects of our world. Virtually every product or service in modern life has been touched in some way by a mechanical engineer.

At Stanley Consultants, providing steam; chilled water; heating, ventilating, and air conditioning; and electrical power generation services has been a hallmark of our company for many years. Utilizing mechanical equipment and systems, including boilers, chillers, turbines, piping, and material handling, our mechanical engineers provide these essential services to commercial, institutional, industrial, and utility clients.

MORE THAN ENGINEERING

Cooling Tower Replacement

For over 90 years Stanley Consultants has provided engineering, architectural, environmental, and construction services worldwide. Providing these services from many domestic and overseas locations, we are ranked among the best engineering firms in the U.S.

At Stanley Consultants we value our members and their capabilities, initiative, integrity, creativity, and commitment as our most important assets. We strive to provide satisfying growth opportunities and a role in shaping our mutual future. We offer the opportunity to work on a variety of interesting projects across the U.S. and overseas in a professional and challenging work environment. We encourage professional and personal development by providing a learning environment that offers training, continuing education, licensing, and mentoring programs. Career paths are available for members who want to build upon their technical expertise, for those working through the project organization to become project managers, for potential line managers, and for those interested in business development and marketing.
